

G eography

A-Level Geography is an exciting subject which enables you to deepen your understanding of your place in the world. You will study contemporary challenges including climate change, food security and population growth. We teach AQA Geography, which asks relevant questions about what is happening in your world right now.

As a subject where fieldwork is essential, we adopt an enquiry-based approach, through which you will develop your analytical, evaluative and decision-making skills.

Course Outline

AS Level

Water and carbon cycles
Hazards
Changing places
Fieldwork

A Level

Global systems and global governance
Coastal systems and landscapes
Contemporary urban environments

AS and A-Level geography are decoupled and not studied here as a linear course.

Career Progression

Geography graduates are among the most employable, due to the variety of skills acquired at 6th form and university. Geography provides an excellent foundation for moving on to a wide range of careers, e.g. working for NGOs, law practices and using Geographical Information Systems.

Complementary Subjects

Geography shares common topics with Economics, Science and History, but combines successfully with nearly every other AS/A2 subject.

Entry requirements

Students must have at least a grade 6 in both GCSE Geography and English.

What our Students say:

"I love learning about other places in the world and how we are connected with them. Geography really helps me to understand my place in the world"

Minali – Class of 2018
