

# Economics

As an individual, you face the problem of having only limited resources with which to fulfil your unlimited wants. As a result, you must make certain choices with your

money, economists are interested in the choices you make.

We will learn how we can model human behaviour by making assumptions. These models allow us to make predictions from a consumer switching between substitute goods in microeconomics to a whole country specialising in the production of a raw material in macroeconomics.

## Team learning:

We pride ourselves on our competitive team based activities through which we learn about the founding fathers and the modern mothers leading the way today.

## Assessment

**Exam board:** Edexcel

Three written exams at the end of Year 13
