

Psychology

A level Psychology aims to challenge and explore your understanding of human behaviour and the complex processes which underpin this.

As a Psychology student you will be looking into the science behind unanswered questions such as; *are we born or made evil? How does our memory work, and can we trust it? Can our behaviour be changed by the influence of one person?*

Psychology requires an objective outlook, therefore over the duration of the course you will acquire the ability to critically analyse and formulate opinions heavily backed up by research and evidence.

Course Outline

Year 1

Research Methods
Approaches in Psychology
Social Psychology
Attachment
Memory
Individual Differences

Year 2

Biopsychology
Relationships
Schizophrenia
Issues and Debates

Career Progression

Due to the vast number of specialisms available within this subject, Psychology can offer many professional career routes including Law, Health, Education, Research, Forensic and Counselling to name just a few. The universal skills of evaluation, analysis and interpretation also provide a fundamental stepping stone into further education or the workplace.

Complementary Subjects

Psychology covers many diverse and fascinating topics, from sports development to cognitive processes, therefore it links well with most other A level subjects. However, particular overlaps include Science (Biology, Physics, and Chemistry), Sociology, Media and English.

Entry requirements

Students must have at least a grade 6 in GCSE Maths and Science

What our Students say:

'Psychology is exciting, interesting and very beneficial to my understanding of behaviour. I would highly recommend this course to anyone who wants to explore human behaviour!'
